Search Notes

Dear Examiner Haq:

Please find attached the results of your search for 09/712935.

The search was conducted using the mandatory database lists for Business Methods.

These other sources were also used: Internet, STN

If you have any questions, please do not hesitate to contact me.

Thanks for using EIC3600!

Ginger

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Efficient Implementation of an Auction Proxy Bid Engine

Inventors (please provide full names): Ying Xie; Elaine Chien; Peter C. Williams

Earliest Priority Filing Date: November 15, 2000

**For Sequence Searches Only* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

Searches to date:

- EAST SEARCH as shown.

BACKGROUND OF INVENTION

The invention is directed to a computer-based method and system for conducting an on-line auction. The process begins by receiving proxy bids with a limit price and a requested quantity from a plurality of bidders. The system then sorts the bids in descending order based upon the limit prices of the proxy bids. The system then assigns a "winner bidder" designation to the bidder with the highest proxy bid, and allocates the quantity requested by the winning bidder to the winning bidder. If the quantity being offered by the auction is greater than zero then the auction goes to the next highest proxy bid and assigns that bidder the "winning bidder" designation. The system repeats this process until the quantity being offered by the auction is zero. At this point, the system generates a winning sales price for the winning bidders. It does this by determining from the descending order a highest losing bidder (i.e. a bidder who did not receive any allocation of goods), and increments this bidder's limit price by a predetermined increment level to generate a winning sales price. If one of the winning bidders declines the allocated goods then the system allocates a portion of the goods to the highest losing proxy bidder and generates a second winning price for the highest losing bidder that is equivalent to the limit price of the highest losing bidder.

I need prior art that teaches determining a second winning price for a highest losing bidder when a winning bidder declines an allocation of goods.

Please provide an NPL search for claim 1 and an inventor search. All references must be before the priority date as shown above.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Title: A mathematical model for analyzing the proxy bidding method for
mobile agent-based auction services

...Abstract: of the paper is that it presents a mathematical model to
analyze the commonly used "proxy bidding method." Based on the
distribution of the maximum bidding price, the model can be used to find
the probability of stopping at a certain price and, hence, the average
winning price. Simulation and analytical results are presented to
demonstrate the behavior of the system.

...ABSTRACT system for trading instrument, such as foreign exchange
currencies, is provided in which bids are automatically matched against
offer for given trading instruments for automatically providing matching
transactoins in order to complete trades for...

...SPECIFICATION system for trading instruments, such as foreign exchange
currencies, is provided in which bids are automatically matched against
offers for given trading instruments for automatically providing
matching transactions in order to complete trades for...network overhead
that is required by transmitting only summary information about the book
and typically restricts the price depths that are sent down, such as
the depth of three given in the example...as far into the order book as
needed until the order is filled or the limit price is reached.
with respect to the credit control mechanism of the present invention,
it comprises...

...CLAIMS A3

1. A risk control matching system for trading instruments in which
bids are automatically matched against offers for given trading
instruments for automatically providing matching transactions in
order to complete trades for...

...ABSTRACT A2

A matching system and method for trading instruments are provided in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...

...SPECIFICATION of the Invention

A matching system for trading instruments is provided in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...network overhead that is required by transmitting only summary information about the book and typically restricts the price depths that are sent down, such as the depth of three given in the example...

...SPECIFICATION book.

US-A-3573747 discloses a matching system for trading instruments in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...

...higher level databases. However that document neither concerns a matching system in which bids are automatically matched against offers for given trading instruments nor describes or suggests that the content of each local database...of the Invention

A matching system for trading instruments is provided in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...network overhead that is required by transmitting only summary information about the book and typically restricts the price depths that are sent down, such as the depth of three given in the example...

...CLAIMS A3

1. A matching system for trading instruments in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...

...distributed matching system method for trading instruments in a matching system in which bids are automatically matched against offers for given trading instruments for automatically providing matching transactions in order to complete trades for...

...CLAIMS B1

1. A matching system for trading instruments in which bids are

automatically matched against offers for given trading instruments
for automatically providing matching transactions in order to
complete trades for...

...SPECIFICATION half of the screen, Purchases on the other. For each
order, the security's symbol, best bid, market or exchange displaying
that best bid (an '*' means the best bid resides on the system
represented by the current invention), similar information for the ask
price, the multiple of 100 shares represented by the best bid and
ask, the size of this client's order in multiples of 100 shares and the
current limit price associated with this order.

The one order listed on the Purchase side of the screen in Figure 2
indicates that this client has...

...all prices are displayed as whole dollars plus the numerator of the
appropriate fraction). The best bid for the stock is \$16.125 for
5,000 shares. That bid resides on the system represented by this
invention, and is obviously this order. The best offer happens to be
on the Midwest Stock Exchange, it is for 10,000 shares at...system and
the percent change for the day is the measurement in eighths from the
best ask for sales, bid for purchases, and the limit price for the
order on the system represented by...

...000 shares of FEA which is up 4% from the previous night's close. The
best bid is \$21 on the New York Stock Exchange, according to the
client's securities information...

...order size and percent move to inform the user that the system order is
the best available price less one eighth.

Figure 6 illustrates information displayed on a screen relevant to a
single...

...eighth, previous close to last sale) and volume. Shown below are the best and next best bid and ask residing on the system, and the best bids and offers represented by the...when quotes are identical. Order placement will be biased by the relative sizes of the best bid and/or offer of different external auto-traders. The invention will move orders to the...

Office copiers now offer standard features at top speeds
Wormald, Karen
Office Systems v10n3 PP: 20-22 Mar 1993
ISSN: 8750-3441 JRNL CODE: OFS
WORD COUNT: 1110

ABSTRACT: Unlike older copier machines, today's models typically perform at maximum speed even when sorting, stapling, duplexing, or feeding automatically and offer greatly reduced warm-up times. Furthermore, newer models have enhanced reduction-enlargement and paper-feeding...
